

AJLLC Combined Master Inventory Valuation

Precious metals + gemstones, diamond jewelry, watches and diamond chain estimates - regenerated July 4, 2026

Spot inputs: gold \$4,200.00/ozt, silver \$65.00/ozt, platinum \$1,552.40/ozt. Includes new July 4 additions: 30.0 g 14K watch and 12.0 g 14K moon chain. Stone/watch values carried from the June 29, 2026 gemstone workbook (low-high estimate ranges).

Component	Low USD	High USD	Basis
A. Precious metals melt/spot (gold + silver + platinum)	\$254,052.45	\$254,052.45	Single-point melt at stated spots; incl. new 14K watch + moon chain
B. Metal chain premiums (gold \$15/g incl. moon chain; sterling \$5/g)	\$39,177.00	\$39,177.00	Flat per-gram market premium on chain weight only
C. METALS SUBTOTAL (A+B)	\$293,229.45	\$293,229.45	
D. Diamond / diamond jewelry (26 rollup rows incl. IGI 6 ctw lab stud pairs)	\$31,309	\$78,274	Stone component only; metal/settings excluded
E. Colored gemstones (15 rollup rows: sapphire, ruby, emerald, etc.)	\$14,494	\$71,117	Broad ranges; treatment/origin unverified
F. Watches (Concord, 2x Breitling, Citizen, Charriol)	\$5,400	\$12,050	Comp-based, not service-adjusted
G. Diamond chain / tennis estimates (6 priceable of 8 rows)	\$5,672	\$15,883	Length/mm-derived ctw x SI melee \$/ct
H. STONES / JEWELRY / WATCHES SUBTOTAL (D+E+F+G)	\$56,875	\$177,324	Matches workbook base+chain rollup
GRAND COMBINED TOTAL (C+H)	\$350,104.45	\$470,553.45	

Reconciliation and double-count guards

- Metals vs stones:** the metals ledger values metal content only (stones excluded); the gemstone workbook values stone components only (metal/settings excluded unless a watch comp was used). The two ledgers are complementary and are added without overlap, with one flagged exception below.
- Concord watch overlap flag:** the new 30.0 g 14K watch in the metals ledger may be the Concord (AJ-044) valued at \$1,400-\$4,600 by comps. If it is the same physical watch, subtract either its melt line (\$2,363.34) or the comp range from the combined totals to avoid double counting; its melt value sets the floor.
- Moon chain:** the 12.0 g 14K moon chain is metal-only here (melt + \$15/g chain premium); any stones on it are not separately valued.
- Tennis/diamond chains (G):** stone values only. The metal weight of those chains is assumed already inside the weighed gold/sterling chain totals of the metals ledger.
- Excluded workbook rows (AJ-015 possible duplicate, AJ-021 no ctw, AJ-033 ambiguous cost) carry \$0 in all rollups and are listed for completeness.

Key caveats

Stone values are not replacement appraisals and mostly exclude gold/setting/labor unless a watch comp was used. Mounted gemstones cannot be fully graded without testing; natural/lab/simulant needs proof for each high-value row. Color, treatment, origin, cut, fluorescence, reports, service condition, and metal weights can materially change value. IGI 6 ctw stud pairs are included as lab-grown VS1 per user clarification (2026-06-29); no 6 ctw GIA/natural stud pair is owned. Metals: no assay/XRF, stone deduction, refiner schedule, bid/ask spread, tax, or liquidation discount applied. Workbook web benchmarks were checked June 29, 2026 and are not re-verified as of this regeneration.

Section 1 - Precious metals ledger

Melt/spot and premium valuation of all weighed metal. Locked correction: the 366.6 g 14K, 50.0 g 18K, and 10.0 g 10K non-chain/ring weights are not removed from melt - they are excluded only from the chain-premium base. 22K is treated as coins, not chains. New July 4 additions: the 30.0 g 14K watch is non-chain (melt only, no premium); the 12.0 g 14K moon chain earns melt + \$15/g chain premium.

Bucket	Melt / spot value	Premium value	Total value
Gold - all karats/bars/coins (incl. new watch + moon chain)	\$230,630.87	\$34,278.00	\$264,908.87
Silver - sterling/coins/bars/.999	\$22,922.42	\$4,899.00	\$27,821.42
Platinum - 10.0 g	\$499.16	\$0.00	\$499.16
METALS TOTAL	\$254,052.45	\$39,177.00	\$293,229.45

Assumptions and pricing inputs

Input	Treatment used in this PDF
Gold spot	\$4,200.00 per troy ounce - user-stated (updated July 4, 2026)
Silver spot	\$65.00 per troy ounce - user-stated (updated July 4, 2026)
Platinum spot	\$1,552.40 per troy ounce - web-verified APMEX quote (July 1); update before formal reliance
Troy conversion	31.10 grams per troy ounce - user-stated conversion used throughout
Gold chain premium	\$15 per gross gram of gold-chain weight only (now includes the 12.0 g moon chain)
Silver chain premium	\$5 per gross gram of sterling-chain weight only
Silver bars	User formula for the 2 bars: 32.15 g / 31.10 x 2 = 2.068 ozt total. If 32.15 is actually ozt each, see sensitivity note.
Proof status	Weights are photo-read and/or user-stated in chat. No assay/XRF, stone deduction, refiner schedule, bid/ask spread, tax, or liquidation discount is applied.

Weight totals

Metal group	Gross grams	Fine/spot grams	Fine/spot troy oz	Notes
Gold total	2,868.5 g	1,707.8 g	54.912 ozt	14K (incl. 30.0 g watch + 12.0 g moon chain) + 18K + 10K + 22K coins + 24K bars
Silver total	11,546.0 g	10,967.5 g	352.653 ozt	Includes sterling/coins/.999/184 ozt/two 32.15 g bars
Platinum	10.0 g	10.0 g	0.322 ozt	10.0 g platinum valued at current spot input
Total gross metal weight	14,424.5 g	-	-	Gross physical weight before purity conversion

Uncollateralized inventory - melt value

Collateral status based on user statement that the first photographed/logged group was uncollateralized.

Item	Gross weight	Purity / factor	Fine g	Fine ozt	Melt value	Note
14K gold	1,553.5 g	14/24	906.2 g	29.139 ozt	\$122,381.83	Scale/photo/user confirmed
18K gold	130.4 g	18/24	97.8 g	3.145 ozt	\$13,207.72	Scale/photo/user corrected
10K gold	300.9 g	10/24	125.4 g	4.031 ozt	\$16,931.67	Scale/photo/user confirmed
22K gold coins	33.4 g	22/24	30.6 g	0.984 ozt	\$4,134.73	22K is coins; no chain premium
Platinum	10.0 g	spot metal	10.0 g	0.322 ozt	\$499.16	Scale/photo/user confirmed
925 sterling goods + chains	4,113.0 g	0.925	3,804.5 g	122.332 ozt	\$7,951.58	Includes 979.8 g sterling chains
90% silver coins	1,242.5 g	0.900	1,118.3 g	35.957 ozt	\$2,337.18	1,174.5 g + 68.0 g
40% Kennedy half dollars	242.7 g	0.400	97.1 g	3.122 ozt	\$202.90	User stated
.999 silver	161.1 g	0.999	160.9 g	5.175 ozt	\$336.37	User stated pure .999
UNCOLLATERALIZED SUBTOTAL					\$167,983.14	Melt/spot only; premiums separate

Collateralized inventory - melt value

Collateral status based on user correction: the later batch is collateralized.

Item	Gross weight	Purity / factor	Fine g	Fine ozt	Melt value	Note
14K gold	589.7 g	14/24	344.0 g	11.061 ozt	\$46,455.47	Collateralized addition list
18K gold	101.3 g	18/24	76.0 g	2.443 ozt	\$10,260.29	Collateralized addition
10K gold	24.0 g	10/24	10.0 g	0.322 ozt	\$1,350.48	Collateralized addition
24K gold bars	93.3 g	24/24	93.3 g	3.000 ozt	\$12,600.00	3 x 31.10 g bars = 3 ozt
Pure silver	5,722.4 g	1.000	5,722.4 g	184.000 ozt	\$11,960.00	184 ozt x 31.10 g/ozt
Two silver bars	64.3 g	1.000	64.3 g	2.068 ozt	\$134.39	User formula: 32.15 g / 31.10 x 2
COLLATERALIZED SUBTOTAL					\$82,760.63	Melt/spot only; premiums separate

New additions - July 4, 2026 - melt value

Collateral status not stated for these two items; tracked separately pending assignment.

Item	Gross weight	Purity / factor	Fine g	Fine ozt	Melt value	Note
14K gold watch (new)	30.0 g	14/24	17.5 g	0.563 ozt	\$2,363.34	Gross gold weight user-stated; valued for gold content only - movement/brand/non-gold parts not valued. Non-chain: no premium. See Concord overlap flag.
14K moon chain (new)	12.0 g	14/24	7.0 g	0.225 ozt	\$945.34	Chain: earns \$15/g premium (see premium table)
NEW ADDITIONS SUBTOTAL					\$3,308.68	Melt/spot only; premiums separate

Premium calculations

Premiums are added on top of melt values. They do not reduce or replace melt value. Non-chain/ring weights remain included in melt. Premium rates are flat per-gram and unchanged by the spot update. The new 12.0 g moon chain is added to the gold chain premium base; the new watch is non-chain and earns no premium.

Gold premium item	Combined gross g	Non-chain/rings excluded	Premium grams	Rate	Premium value
14K gold chains	2,143.2 g	366.6 g	1,776.6 g	\$15/g	\$26,649.00
18K gold chains	231.7 g	50.0 g	181.7 g	\$15/g	\$2,725.50
10K gold chains	324.9 g	10.0 g	314.9 g	\$15/g	\$4,723.50
14K moon chain (new)	12.0 g	0.0 g	12.0 g	\$15/g	\$180.00
GOLD CHAIN PREMIUM TOTAL	2,711.8 g	426.6 g	2,285.2 g	\$15/g	\$34,278.00

Silver premium item	Gross chain grams	Rate	Premium value	Notes
Sterling chains	979.8 g	\$5/g	\$4,899.00	146.1 + 622.1 + 121.3 + 90.3 g; no premium on coins, bars, hollowware, or non-chain sterling goods

Metal/value summary by status

Status / bucket	Melt value	Premium allocation	Total shown
Uncollateralized melt subtotal	\$167,983.14	Premiums tracked separately	\$167,983.14
Collateralized melt subtotal	\$82,760.63	Premiums tracked separately	\$82,760.63
New additions melt subtotal (July 4; status not stated)	\$3,308.68	Premiums tracked separately	\$3,308.68
Gold chain premium (incl. moon chain)	\$0.00	\$34,278.00	\$34,278.00
Silver chain premium	\$0.00	\$4,899.00	\$4,899.00
METALS GRAND TOTAL	\$254,052.45	\$39,177.00	\$293,229.45

Sensitivity / verification note

The main open interpretation is the two silver bars. This PDF uses the user-stated formula $32.15 \text{ g} / 31.10 \times 2$, giving 2.068 ozt and \$134.39 at \$65/ozt. If the bars are actually 32.15 troy ounces each, that line becomes \$4,179.50, increasing the metals grand total by \$4,045.11 to \$297,274.56 and the combined totals to \$354,149.56 - \$474,598.56.

Detailed arithmetic checks - metals

Line	Formula	Result
14K combined weight	1,553.5 g + 589.7 g + 30.0 g watch + 12.0 g moon chain	2,185.2 g
18K combined weight	130.4 g + 101.3 g	231.7 g
10K combined weight	300.9 g + 24.0 g	324.9 g
14K chain premium grams	2,143.2 g - 366.6 g rings/non-chain + 12.0 g moon chain	1,788.6 g
18K chain premium grams	231.7 g - 50.0 g rings/non-chain	181.7 g
10K chain premium grams	324.9 g - 10.0 g rings/non-chain	314.9 g
Gold chain premium	$(2,273.2 \text{ g} + 12.0 \text{ g}) \times \$15/\text{g} = 2,285.2 \text{ g} \times \$15/\text{g}$	\$34,278.00
Sterling chain grams	146.1 + 622.1 + 121.3 + 90.3 g	979.8 g
Silver chain premium	979.8 g x \$5/g	\$4,899.00
14K watch melt (new)	30.0 g x 14/24 / 31.10 x \$4,200/ozt	\$2,363.34
14K moon chain melt (new)	12.0 g x 14/24 / 31.10 x \$4,200/ozt	\$945.34
24K gold bars	31.10 g x 3 bars = 93.3 g = 3.000 ozt x \$4,200/ozt	\$12,600.00
184 ozt pure silver	184 ozt x \$65/ozt	\$11,960.00
Two silver bars	32.15 g / 31.10 x 2 x \$65/ozt	\$134.39
Platinum	10.0 g / 31.10 x \$1,552.40/ozt	\$499.16
Gold melt subtotal	sum of all gold melt lines at \$4,200/ozt	\$230,630.87
Silver melt subtotal	sum of all silver melt lines at \$65/ozt	\$22,922.42
METALS GRAND TOTAL	melt \$254,052.45 + premium \$39,177.00	\$293,229.45

Known exclusions and gaps - metals

The metals section does not value diamonds, gemstones (valued separately in Section 2), watch movements/brands (the 30.0 g 14K watch is valued for gold content only), maker premiums, numismatic premiums, ticket payoff balances, interest, lender fees, tax, refining fees, shipping, assay costs, stone deductions, or liquidation discounts. It is a working metal-content ledger and value snapshot based on the supplied weights and spot-price inputs.

Section 2 - Gemstone, diamond jewelry and watch inventory (every piece)

All 48 workbook rows (AJ-001 to AJ-047, with AJ-018 split as 018A/018B) with maximum stated detail. Values are stone-component (or watch-comp) estimate ranges from the 2026-06-29 workbook; benchmarks on the price-benchmark page. Rows shaded red are excluded from rollups (duplicate risk, missing ctw, or ambiguous cost). D = diamond jewelry, C = colored gemstone, W = watch.

ID	Item (qty)	Stones / stated data	ctw	Cat	Low USD	High USD	Conf.	Basis and verification needs
AJ-001	Diamond cluster/setting, name not yet assigned (1)	6.65 ctw VS/VS1 diamonds; ~30 x 3.5 mm + 60 x 2.0 mm	6.65	D	\$3,325	\$6,617	Medium-low	Natural VS melee range, stone component only. Need photo, metal karat/weight, tester confirmation, exact color grades.
AJ-002	Picture / texture pendant, diamonds (1)	3.80 ctw diamonds; 50 stones ~3.3 mm; VS1 stated	3.80	D	\$1,900	\$3,781	Medium-low	Natural VS melee range. Need exact name, photo, metal weight, color grade, natural/lab tester confirmation.
AJ-003	10K pendant with small diamonds (1)	0.75 ctw very small VS melee; count not stated	0.75	D	\$375	\$746	Low	Natural VS melee range. Need pendant photo, metal weight, stone count/sizes.
AJ-004	Italian horn pendant (1)	3.25 ctw small VS diamonds; counts/sizes not fully stated	3.25	D	\$1,625	\$3,234	Medium-low	Natural VS melee range. Need photo, exact metal weight; verify vs any emerald horn reference.
AJ-005	Hamsa pendant, natural diamond version (1)	0.70 ctw small VS diamonds (earlier 0.66 ctw superseded)	0.70	D	\$350	\$697	Medium-low	Natural VS melee range. 0.70 ctw user-confirmed.
AJ-006	Wave / lab-grown diamond Hamsa pendant (1)	2.67 ctw lab-grown VS1 diamonds; count not stated	2.67	D	\$267	\$1,335	Medium-low	Lab melee/small-stone estimate; LGD prices compressed/volatile. Need tester confirmation and metal weight.
AJ-007	Deep blue sapphire piece w/ diamond accents (1)	6.55 ct deep blue sapphire + 0.62 ctw VS diamonds	7.17	C	\$2,275	\$10,442	Low	Sapphire at commercial-to-good/fine placeholder + VS melee; untreated premium origin could be higher. Need sapphire ID, treatment, origin, cert; daylight photos; exact diamond color.
AJ-008	Ruby + diamond ring/piece (1)	8 rubies totaling 0.74 ctw + 4 round diamonds 0.50 ctw	1.24	C	\$324	\$1,090	Medium-low	Small rubies commercial-to-good + natural melee. User clarified: one piece, not a separate ruby lot.
AJ-009	Green amethyst / prasiolite piece (1)	Center stone ct unknown (heavy); 0.23 ctw VS diamonds; ~14.77 x 15.36 x 11 mm stated	-	C	\$165	\$529	Low	Placeholder center quartz/prasiolite + VS accents. Need actual weight, shape, RI/SG, photo; dimensions unclear from speech.
AJ-010	Citrine piece with diamond accents (1)	Citrine ~2-3 ct + 0.33 ctw VS1 diamonds; dims stated same as amethyst (conflicts)	2.5	C	\$175	\$478	Low	Citrine modest per-carat range + VS accents. Need remeasure; dimensions vs 2-3 ct weight likely conflict.
AJ-011	Natural round SI diamond center stone (1)	Round ~6.49 mm; SI; stated 10 mm depth is inconsistent for a normal round brilliant	1.00	D	\$2,000	\$5,000	Low	1 ct natural placeholder; color/cut/cert drive value. Remeasure depth; confirm if mounted measurement included setting.
AJ-012	Emerald-cut diamond, loose/center (1)	1.00 ct emerald-cut VS1; natural assumed from context	1.00	D	\$2,500	\$6,000	Low	1 ct natural emerald-cut placeholder. Need color, measurements, lab report, fluorescence, cut/proportions.
AJ-013	Eternity ring #1 / 72-stone diamond ring (1)	7.55 ctw VS1 stated; 72 stones; 4.3 mm stated but conflicts with total ctw	7.55	D	\$3,775	\$7,512	Low	Valued on user-stated ctw, not size-derived (mismatch). Verify diameter/count/ctw: 72 x 4.3 mm would imply much higher ctw.
AJ-014	Eternity ring #2 (1)	6.50 ctw diamonds; VS1 assumed from context; counts/sizes not stated	6.50	D	\$3,250	\$6,468	Medium-low	Natural VS melee range. Need stone count, size, metal, photos.
AJ-015	Possible additional eternity ring, 21 stones (1)	21 stones ~4-5 mm (likely 4.5 mm); est ~7.56 ctw if 4.5 mm rounds	~7.56	-	\$3,780 (excl.)	\$7,522 (excl.)	Very low	EXCLUDED from rollup (Review): could duplicate AJ-013/AJ-014; do not rely until ring is identified.
AJ-016	Triangle earrings / triangle pendants (1)	0.72 ctw diamonds; VS/SI assumed from context	0.72	D	\$300	\$716	Low	Small natural placeholder. Name uncertain (earrings vs pendants).
AJ-017	Three sapphire Star of David rings (3)	Per piece: 0.48 ctw blue sapphires + 0.48 ctw VS1 diamonds; totals 1.44 + 1.44 ctw	2.88	C	\$792	\$2,153	Low	Per-piece ~\$264-\$718; rollup assumes 3 pieces. Confirm quantity (speech: 'two, three' then 'three').
AJ-018A	Cuban ring #1, natural diamonds (1)	1.85 ctw natural diamonds; VS/SI context	1.85	D	\$925	\$1,841	Medium-low	Natural small-diamond placeholder; supersedes earlier 1.1 ctw note. Verify against tag.
AJ-018B	Cuban ring #2, lab diamonds (1)	1.85 ctw lab diamonds	1.85	D	\$185	\$925	Medium-low	Lab small-diamond placeholder; supersedes earlier 1.1 ctw note. Verify against tag.
AJ-019	Small diamond ring (1)	0.23 ctw VS diamonds	0.23	D	\$115	\$229	Medium-low	Natural VS melee placeholder. Need exact item photo/name.
AJ-020	Letter E ring / pendant (1)	16 diamonds x 1.10 mm; est ~0.10 ctw total	~0.10	D	\$30	\$100	Very low	Estimated from tiny round size chart only. Need exact ctw.
AJ-021	Emerald lion pendant (1)	1 x 3.5 mm emerald (mouth) + 2 x 1.5 mm emeralds; ctw not stated	-	-	-	-	Very low	EXCLUDED from rollup (No): ctw missing and stones very small. Need weight/ctw estimate; verify natural.

ID	Item (qty)	Stones / stated data	ctw	Cat	Low USD	High USD	Conf.	Basis and verification needs
AJ-022	Emerald dagger pendant (1)	1.275 ctw natural green emeralds; counts/sizes not stated	1.275	C	\$638	\$3,825	Low	Commercial-to-fine emerald placeholder. Confirm 1.275 ctw belongs to dagger pendant.
AJ-023	Two Chai pendants (2)	Assumed 0.836 ctw natural VS each -> 1.672 ctw total	1.672	D	\$836	\$1,663	Low	If 0.836 is total (not per pendant), divide value -by 2. Confirm.
AJ-024	Gorilla pendant (1)	0.54 ctw diamonds + 2 rubies x 2.5 mm + 1 garnet 7.5 x 7.5 mm	-	C	\$370	\$1,340	Low	Diamond accents + small ruby/garnet placeholder. Need colored-stone weights, photos; garnet variety unknown.
AJ-025	Aquamarine stone/piece (1)	10 x 9 mm; 4.5 ct stated	4.5	C	\$90	\$2,250	Low	Commercial-to-fine broad range. Need color saturation, clarity, treatment, actual depth.
AJ-026	Two pairs diamond stud earrings (2)	0.77 ctw per pair; 1.54 ctw total; quality/origin not stated	1.54	D	\$385	\$1,078	Low	SI/natural placeholder. NOT the IGI 6 ctw pairs. Need origin, clarity, color, any certs.
AJ-027	Dog tag pendant (1)	~2.0 ctw natural SI diamonds	2.0	D	\$500	\$1,400	Medium-low	Natural SI melee placeholder. Need exact ctw, metal weight, count/sizes.
AJ-028	Heart earrings (1)	1.50 ctw natural baguette diamonds; count not stated	1.5	D	\$600	\$1,500	Low	Baguette placeholder; make/color move value. Confirm whether 1.5 ctw is for the pair.
AJ-029	Ace pendant (1)	1.25 ctw natural VS1 white + 0.50 ctw natural black diamonds	1.75	D	\$675	\$1,494	Medium-low	White melee + conservative black-diamond placeholder. Need black diamond treatment/origin, metal weight.
AJ-030	Uzi pendant (1)	1.343 ctw natural VS1 diamonds	1.343	D	\$672	\$1,336	Medium-low	Natural VS melee placeholder. Need photo, metal weight, exact stone count.
AJ-031	Roman claw pendant (1)	1.60 ctw emeralds; treatment/origin unknown	1.60	C	\$800	\$4,800	Low	Emerald commercial-to-fine range. Maker/name ('German/Yurman Roman claw'?) needs confirmation.
AJ-032	AK-47 pendant (1)	1.842 ctw; user said 'glass/lab' - origin unclear (lab vs simulant vs natural)	1.842	D	\$184	\$1,833	Very low	Wide placeholder spanning simulant-to-natural. Must screen with diamond/moissanite/lab tester before relying.
AJ-033	Rubies with emeralds lot (1)	5.00 ctw rubies + emeralds total; wholesale cost transcribed '\$4,3500' (ambiguous: \$4,350 or \$43,500)	5.00	-	-	-	Very low	EXCLUDED from rollup (No): ambiguous cost, no quality detail. Need invoice, gem mix, origin/treatment, per-species weights.
AJ-034	Colombian emerald, GIA pending, loose (1)	Natural Colombian, oiled, 2.43 ct; 8.90 x 8.04 x 5.38 mm; user-stated ~\$5,000 anchor	2.43	C	\$4,000	\$7,500	Medium-low	User \$5k anchor + Colombian market guide; oil level/color/clarity decide. GIA report number/result pending.
AJ-035	Natural sapphire melee / stones (1)	9.30 ctw sapphires; 3 mm stones	9.30	C	\$465	\$4,650	Low	Commercial-to-good small-stone range. Need color breakdown, treatment, count, mounting status.
AJ-036	Pink sapphires with natural SI diamonds (1)	11.00 ctw pink sapphires + 1.80 ctw natural SI rounds (192 stones)	12.80	C	\$3,200	\$17,760	Low	Pink sapphire commercial-to-good/fine + SI melee. Need sapphire treatment/color, diamond size/count confirmation.
AJ-037	Colored sapphires parcel (1)	23.00 ctw natural colored sapphires; treatment/color mix unknown	23.00	C	\$1,150	\$13,800	Low	Mixed colored sapphire placeholder. Need color map, treatment, counts, sizes, photos.
AJ-038	Large smoky quartz, likely (1)	35 ct, no scratches; smoky quartz identity discussed/accepted	35	C	\$50	\$200	Low	Large smoky quartz comps are modest. Confirm identity.
AJ-039	Colorless / white simulant-type stone (1)	18.5 ct; possible white topaz, white sapphire, CZ, or other simulant	18.5	C	\$0	\$300	Very low	Placeholder for topaz/CZ scenario only. Need RI/SG/tester; if CZ/glass, value may be negligible.
AJ-040	Two loose lab stones (2)	6.00 ctw total; lab-grown stated; likely diamonds, not certified	6.00	D	\$600	\$4,500	Low	Lab placeholder; if certified large diamonds, use actual report comps. Need IGI/GIA/GCAL reports or tester.
AJ-041	Bail/bell with small diamonds (1)	18 diamonds x 1.5 mm; est ~0.27 ctw	~0.27	D	\$135	\$269	Very low	Estimated from size chart + natural melee placeholder. 'Bell' likely bail; ctw not stated.
AJ-042	C pendant (1)	~2.00 ctw natural baguette diamonds	2.0	D	\$800	\$2,000	Low	Baguette placeholder; depends on color/clarity. Need exact count, color, clarity, metal weight.
AJ-043	IGI lab-grown VS1 stud earrings, two pairs (2)	6.00 ctw per pair (3 ct per stone); 12.00 ctw total; IGI certified stated; NO GIA claim	12.00	D	\$5,000	\$16,000	Medium-low	Current 6 ctw lab IGI stud-pair comps (\$2,500-\$8,000/pair). Get IGI report numbers/photos (origin, VS1, color, cut, inscriptions). Do not label GIA.
AJ-044	Concord Quartz gold watch (1)	Concord Quartz 14K; ref/serial 209-8352-38556	-	W	\$1,400	\$4,600	Low	14K Concord comps/auctions; gold weight not supplied in workbook. POSSIBLE SAME ITEM as the new 30.0 g 14K watch added to the metals ledger - see reconciliation note.

ID	Item (qty)	Stones / stated data	ctw	Cat	Low USD	High USD	Conf.	Basis and verification needs
AJ-045	Breitling Superocean A17364 (2)	Two watches, ref A17364	-	W	\$3,600	\$5,500	Medium-low	WatchCharts market range + Chrono24 comps (~\$1.8k-\$2.75k each). Condition, service, box/papers move price.
AJ-046	Citizen Eco-Drive (1)	Model not stated	-	W	\$100	\$300	Low	Generic Citizen Eco-Drive pre-owned market. Need caseback model and condition.
AJ-047	Charriol Genève 060T (1)	Ref 060T	-	W	\$300	\$1,650	Low	Charriol 060T pre-owned comps; diamond/retail variants higher but not assumed. Need photos, variant, service, box/papers.
SUBTOTALS (rollup rows only)					\$51,203	\$161,441		Diamond \$31,309-\$78,274 + colored \$14,494-\$71,117 + watches \$5,400-\$12,050

Category rollup verification (recomputed from rows vs workbook)

Category	Rows	Low USD	High USD	Workbook stated	Check
Diamond / diamond jewelry (incl. lab + IGI studs)	26	\$31,309	\$78,274	\$31,309 / \$78,274	MATCH
Colored gemstones	15	\$14,494	\$71,117	\$14,494 / \$71,117	MATCH
Watches	4 rows / 5 watches	\$5,400	\$12,050	\$5,400 / \$12,050	MATCH
Base inventory rollup	45	\$51,203	\$161,441	\$51,203 / \$161,441	MATCH
Chain estimates (Section 3)	6 of 8 priceable	\$5,672	\$15,883	\$5,672 / \$15,883	MATCH
Base + chain		\$56,875	\$177,324	\$56,875 / \$177,324	MATCH

Section 3 - Diamond chain / tennis necklace and bracelet estimates

Rough stone-content estimates from user-stated stone diameter and chain length: stones = length / diameter (no spacing), ctw = stones x assumed ct/stone, value = ctw x SI melee \$/ct range. Actual tennis-setting pitch/prong spacing changes count and ctw - all rows very-low confidence. Two rows cannot be priced (diameter missing). Metal weight of these chains is valued in Section 1, stones only here.

ID	Description	Diamond type / quality	Stone mm	Length in	Est. stones	Ct per stone	Est. ctw	\$/ct range	Low USD	High USD	Confidence
CH-001	Natural white diamond line/chain (tennis necklace)	Natural white, SI stated	2.0	16	203	0.03	6.09	\$250-700	\$1,522	\$4,263	Very low
CH-002	Natural diamond line/bracelet	Natural, SI context	3.0	6	51	0.10	5.10	\$250-700	\$1,275	\$3,570	Very low
CH-003	Natural diamond line/bracelet	Natural, SI stated	3.0	7.8	66	0.10	6.60	\$250-700	\$1,650	\$4,620	Very low
CH-004	Natural black diamond chain	Natural black	-	20	-	-	-	\$100-500	Cannot price	Cannot price	Cannot price
CH-005	Natural white diamond line/chain	Natural white, SI stated	-	16	-	-	-	\$250-700	Cannot price	Cannot price	Cannot price
CH-006	Natural SI diamond segment	Natural white, SI stated	2.4	4	42	0.05	2.10	\$250-700	\$525	\$1,470	Very low
CH-007	Natural SI diamond segment	Natural white, SI stated	2.2	3	35	0.04	1.40	\$250-700	\$350	\$980	Very low
CH-008	Natural SI diamond segment	Natural white, SI stated	2.18	3	35	0.04	1.40	\$250-700	\$350	\$980	Very low
CHAIN ESTIMATE TOTAL							22.69		\$5,672	\$15,883	

Watch detail and IGI stud scenarios

Item	Qty	Reference / model	Low USD each	High USD each	Low total	High total	Notes
Breitling Superocean	2	A17364	\$1,800	\$2,750	\$3,600	\$5,500	WatchCharts range + Chrono24; service/box/papers move price
Concord Quartz 14K	1	209-8352-38556; 14K stated	\$1,400	\$4,600	\$1,400	\$4,600	Comp-based; if this is the new 30.0 g watch, melt floor is \$2,363.34 - see overlap flag
Citizen Eco-Drive	1	Model missing	\$100	\$300	\$100	\$300	Need exact caseback model
Charriol Genève	1	060T	\$300	\$1,650	\$300	\$1,650	Variant matters heavily
WATCHES TOTAL	5				\$5,400	\$12,050	

IGI stud scenario	Qty pairs	CTW/pair	Total CTW	Low/pair	High/pair	Low total	High total	In rollup?
Confirmed: two 6 ctw IGI lab-grown VS1 stud pairs	2	6.00	12.00	\$2,500	\$8,000	\$5,000	\$16,000	Yes (AJ-043)
Correction: no 6 ctw GIA/natural stud pair owned	0	0	0	\$0	\$0	\$0	\$0	No - not owned; audit row only

Section 4 - Price benchmarks and assumptions used

Per-carat and per-item benchmark ranges used by the workbook estimates (checked June 29, 2026). A few small-stone rates have no standalone benchmark row and are embedded in their inventory rows - see the embedded-rates line below. Grading reports describe a stone; they are not appraisals or certificates of value. Diamond value depends on cut, color, clarity and carat; color can materially change value at the same clarity/weight.

Category	Benchmark / assumption	Low	High	Unit	Used for
Natural diamond melee, VS/VS1	Stachura 'best' natural melee ~\$995/ct small sizes; wider band used for unverified mounted pieces	\$500	\$995	USD/ct	Natural VS/VS1 diamond jewelry rows
Natural diamond melee, SI	Conservative placeholder for lower-clarity small natural components	\$250	\$700	USD/ct	SI diamond jewelry + chain estimates
Lab-grown diamond small stones	LGD market compressed; Q1 2026 wholesale list declined; retail varies widely	\$100	\$500	USD/ct	Lab diamond pendants/rings/loose stones
Blue sapphire	Commercial ~\$50-\$500/ct; fine ~\$1,000-\$5,000/ct in published guides	\$50	\$5,000	USD/ct	Sapphire placeholders
Pink sapphire	Broad guide ranges; conservative band unless quality proven	\$250	\$1,500	USD/ct	Pink sapphire row AJ-036
Emerald	Commercial jewelry emeralds often \$500-\$3,000/ct; Colombian/fine far higher; oil level and origin crucial	\$500	\$3,000	USD/ct	Emerald rows
Aquamarine	Commercial ~\$20-\$80/ct; good \$80-\$200; fine \$200-\$500; exceptional higher	\$20	\$500	USD/ct	Aquamarine row AJ-025
Citrine	Commercial ~\$5-\$15/ct, medium ~\$15-\$30, high ~\$30-\$50; fine citrine remains modest	\$5	\$50	USD/ct	Citrine row AJ-010
Garnet	Wide by variety; common reds far below ruby	\$50	\$300	USD/ct	Gorilla pendant garnet
Embedded row-level rates	No standalone workbook benchmark: small rubies use commercial-to-good small-stone context; natural baguettes use a conservative placeholder; natural black diamonds use \$100-\$500/ct	-	-	USD/ct	Rubies AJ-008/AJ-024; baguettes AJ-028/AJ-042; black diamonds AJ-029 + CH-004
Smoky quartz	Large stones commonly tens to low hundreds of dollars	\$50	\$200	USD total	35 ct smoky quartz row
White topaz / colorless simulant	Modest; topaz price pressure from oversupply; requires ID first	\$0	\$300	USD total	18.5 ct unknown clear stone
Breitling A17364	WatchCharts/Chrono24 comps ~\$1.8k-\$3.7k by condition; workbook uses ~\$1.8k-\$2.75k each	\$1,800	\$2,750	USD/watch	Breitling row
Concord 14K quartz	Auction estimates ~\$900-\$1,250 to listings \$1,400+; solid gold examples higher; gold weight drives floor	\$1,400	\$4,600	USD/watch	Concord row
Citizen Eco-Drive	Brand average ~\$300; model can range widely	\$100	\$300	USD/watch	Citizen row
Charriol 060T	Pre-owned comps ~\$375-\$1,650; diamond/retail variants higher	\$300	\$1,650	USD/watch	Charriol row
IGI 6 ctw lab studs	Current 6 ctw lab stud comps ~\$2,500-\$8,000/pair by retailer/specs	\$2,500	\$8,000	USD/pair	AJ-043 stud pairs
Gold (metals ledger)	This PDF: \$4,200/ozt = \$135.05/g 24K; 14K melt factor 58.33%. (Workbook June 29 note of ~\$130.6/g superseded.)			USD/g 24K	Section 1 metals

Section 5 - Proof gaps / next-action checklist

Priority	Item(s)	Proof / test needed	Why it matters	Action
High	All diamond-heavy pieces	Diamond tester + lab-grown screen + color/clarity estimates	Mounted pieces and melee are easy to over/under-price	Test and log natural/lab/simulant separately
High	Colombian emerald 2.43 ct (AJ-034)	GIA report result, oil level, origin confirmation	Oil level/color/origin drive emerald value	Wait for GIA report; photograph report
High	Sapphire/ruby/emerald pieces	Treatment/origin testing where value is material	Colored stones vary widely by treatment and origin	Prioritize 6.55 ct sapphire, 23 ct colored sapphires, 11 ct pink sapphires
Medium	IGI lab-grown VS1 6 ctw stud pairs (AJ-043)	IGI report numbers/photos; color/cut/measurements/inscriptions	Confirms active lab VS1 inputs; avoids mislabeling as GIA	Verify each report on IGI site; save screenshots/PDFs with item photos
Medium	Gold watch and all gold jewelry	Gram weight and karat verification	Metal value cannot be calculated without weight	Weigh each item; mark stone-included gross weight. NEW: 30.0 g stated for the 14K watch on July 4 - confirm whether this is the Concord and whether weight is case-only or includes movement/strap
Medium	Eternity ring #1 (AJ-013)	Confirm stone count, diameter, total ctw	72 x 4.3 mm conflicts with 7.55 ctw	Recount and measure 3 stones with caliper
Medium	Natural round SI diamond (AJ-011)	Remeasure depth	6.49 mm round with 10 mm depth is inconsistent	Measure table-to-culet if loose, or tag as mounted estimate
Medium	Chain estimates (CH rows)	Actual stone count or vendor tag	Length/mm estimates ignore prong spacing and setting pitch	Count stones in one inch, multiply by length
Medium	Concord / Breitling / Charriol / Citizen watches	Caseback photos, service status, box/papers	Comp ranges depend heavily on condition and completeness	Photograph front/back/movement if opened by watchmaker
Low	Unknown 18.5 ct clear stone and 35 ct smoky quartz	RI/SG/thermal test	ID controls whether value is negligible or modest	Screen as topaz/quartz/CZ/glass/sapphire

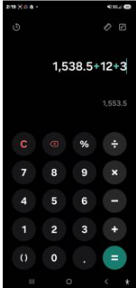

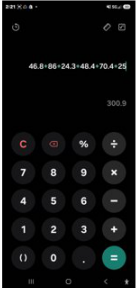

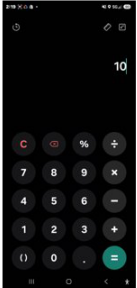

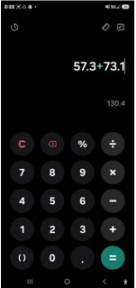

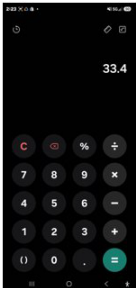

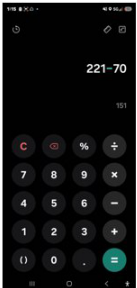

Change log

Date	Item	Change	Valuation effect
2026-06-29	AJ-043 IGI stud earrings, two pairs, 6 ctw each	Reclassified from unknown origin/scenario-only to lab-grown VS1 per user clarification	+\$5,000 low / +\$16,000 high added to active base rollup
2026-06-29	AJ-043 IGI lab-grown VS1 studs	User clarified no 6 ctw GIA/natural stud pair exists; prior GIA comparison marked not owned/correction-only and zeroed	\$0 change; prevents misclassification
2026-07-04	Metals ledger	Spot inputs updated to gold \$4,200/ozt and silver \$65/ozt (user-stated)	Metals melt total \$254,052.45
2026-07-04	New metal items	Added 30.0 g 14K watch (melt only) and 12.0 g 14K moon chain (melt + \$15/g premium)	+\$3,308.68 melt, +\$180.00 premium
2026-07-04	Combined report	Metals ledger and gemstone workbook merged into this single master PDF with double-count guards	Combined range \$350,104.45 - \$470,553.45

Appendix - source scale photo references (metals)

Images are included as chat/source references only. The controlling values are the user-confirmed weights in the tables above.
